

**Collision Avoidance**

- Start between the cones with your front tire
- Complete the move off
- Get to speed and hold it there
- Wait for a signal from instructor;  
go past cones if no instructor is present
- Look, then push where you want to go
- Apply both brakes **after** you are past the row of five cones
- Come to a controlled stop beside the last cone

**Dimensions for 20 km/h**

- Distance from start to first set of cones is 86 feet
- Distance from start line to the five avoidance cones is 100 feet
- Distance from the five avoidance cones to the stop line is 28 feet
- Distance between each avoidance cone is 5 feet

**Dimensions for 40 km/h**

- Double the above dimensions when doing this at 40 km/h
